

Exhibit Car of the Kentucky Tuberculosis Commission

THE Tuberculosis Commission equipped a railroad coach with an exhibit regarding tuberculosis and how to prevent the spread of the disease and has sent it to many points in the state. By means of pictures, descriptions, toy houses and electric devices the whole story of the cause, cure and prevention of consumption is told in graphic form for the passerby. In a little over a year 68,000 people have been reached in all sections of the state. Especial pains have been taken to reach teachers and school children so that this message of good health may be communicated through them to as many people as possible.

Administration Building and Infirmary, Hazelwood Sanatorium, Louisville

THIS building, with adjacent cottages, is the only place in Kentucky for the reception of any case of tuberculosis except for the Jefferson county institution, Waverly Hills Sanatorium and the little Jackson Hill Sanatorium at Paducah. White patients in all stages of the disease may here receive the essentials of treatment—namely, medical supervision, fresh air, rest and correct diet. The rates are \$12.50 per week. Any person interested in obtaining treatment here should address Dr. Oscar O. Miller, Resident Physician, Hazelwood Sanatorium, Rural Free Delivery No. 2, Louisville, Ky. The head nurse is Miss Catherine Hooe of Louisville.

Prominent physicians from all sections of the state comprise the medical advisory board, of which Dr. Ap Morgan Vance is chairman. F. A. Sampson is superintendent.

ALMOST ANY CONSUMPTIVE MIGHT HAVE THIS

POSTS support a framework on which a floor has been built. Above this is a tent. A mosquito netting surrounds the sides. Inside, this room is large enough for a bed and a chair. This can be used in any except the severest winter weather. A double canvas top with eight inches space between will make it cooler in summer than the single tent. Any practical builder can erect this cheaply.

Of course, Dan Cupid promotes marriages, but he ought to give some credit to the old-fashioned porch swing.

Home Treatment For Tuberculosis In Summer

BUILD a floor on a dry bit of ground. It is best to have it raised a few inches above the ground. Erect a tent over it, get a reclining chair and some simple furniture, and you are ready for a cheerful life at home while you fight that dread enemy, the Great White Plague.

Visiting Nurse Saves Her Eyesight

THIS woman with an infected eye was found by a nurse representing the state tuberculosis commission. The nurse secured for her proper medical treatment and showed the woman how to care for herself. Her eyesight was saved. If she had not been found by the nurse she would have delayed visiting the physician till her case had been hopeless.

Insuring a Family

THIS consumptive girl lived in a little house with her parents and four brothers and a sister. When the visiting nurse of the city called upon her she found the whole family in danger of contracting tuberculosis from the young woman through ignorance of the proper methods of caring for the patient. The nurse instructed the members of the family about the preparation of the girl's food and the care of her room, so as to give her every chance for life. Most important of all, the nurse showed how the disease—tuberculosis—is spread from one person to another through the spit and spray from the mouth of a consumptive. They were taught that all of the expectorations should be caught in paper boxes or napkins and burned. Those instructions practically insure the lives of the other members of the family.

"I Don't Feel Good"
That is what a lot of people tell us. Usually their bowels only need cleansing.
Rexall Orderlies
will do the trick and make you feel fine. We know this positively. Take one tonight. Sold only by us, 10 cents.

Sol Holmes, of Henderson county, was shot four times at the polls, Saturday, of last week, and is expected to die.

This is the "Thornhill" Wagon—the Wagon that Must Make Good

The best known materials—the labor of master workmen—the aid of the most ingenious modern machinery have been employed to make the Thornhill wagon.

The wheels are made with excessive care. For the spokes the manufacturers use the finest hickory—machine driven to insure the right dish. The hubs are of oak, thoroughly seasoned and banded with double refined sable iron.

The bolsters are of the best white oak. They have an iron plate at top and bottom, riveted through and through—multiplying their strength.

The "Thornhill" has a malleable front hound plate that is braced to the hounds at all points. This is an exclusive "Thornhill" feature. It prevents the

gears from ever getting out of line and causing hard pulling.

"Thornhill" wagons are equipped with long sleeve malleable—non-breakable skeins that insure light running, and outlast any other skein. Each skein is fitted to its axle with a Defiance machine—infallibly accurate. This machine insures the right pitch and tuck, makes light draft a certainty.

The axles are of toughest nickory—the steel axles of the best refined steel.

The sides of "Thornhill" beds are made of poplar. It costs the makers more—but it holds paint better and gives better service.

Come in and see this wagon—sold under a binding guarantee.
